

SB EndoMyco Mini Granules

Description

A granular Mycorrhizae product containing Glomus sp. extracts from sea organisms, milled minerals, keratin, Patentkali, natural humates, Sapropel and Zeolite. Organically approved and easy to use. **SB EndoMyco** helps establish the critical mycorrhizal fungi infrastructure, around which other beneficial soil microbes will gather in support of the plant and root system.

Ideal for golf courses, sports pitches, lawncare, general amenity turf and horticulture.

Specification

Over 220,000 propagules/Ha

Glomus sp.

Mycorrhizae

Extracts from sea organisms (Chitin, Sea- weed)

Milled minerals (Apatite, Phosphate, Do- lomite)

Keratin

Patentkali

Natural Humates

Application

Amenity: 5 KG/Ha

Herbage seed: 1.0-1.5 KG/Ha mixed with herbage seed. Amenity: 5 KG/Ha

APPLICATION PERIOD -Timing: During drilling mixed with seed. (Can be arranged to be premixed with your herbage seed).

Compatibility

Do not mix with phosphorous granular fertilisers. Do always seek confirmation about your requirements before using.

Contact your technical adviser for further information on compatibility and tank mixing.
